Dear Sirs,

I have been involved with the Self-Contained Breathing Apparatus Fit Testing both at Morrison Correctional Institution, and here at McCain Correctional Hospital for several years. I would like to commend you on the staff who were involved in the fit testing this year. Both Pamela Arntz and Ruby Barrett did an outstanding job in getting our staff that showed up through the testing in a timely manner. They arrived in a timely manner and were ready to stay until testing was completed. Both were very professional in their dealings with our staff, and showed concern for those they did not test due to needing further evaluation. I enjoyed working closely with both of them and hope they are involved with the fit testing in future years.

Please express to them my personal appreciation for the job they did, and my wishes to see them in future years. Again thanks to Doctors Center Health Services for providing this service to us.
